OPEN SOURCE · SELF-HOSTED · FOR GERMAN KITAS

OpenKita AI

Less paperwork.
Better communication.
More time for children.

An open-source, self-hosted AI assistant for German Kitas and childcare providers (Träger)

Status: v0.1 in progress — foundation built (app shell, health checks, Ollama connection test); AI features in development.

Idea not yet validated · illustrative mock-up, fictional data only

Paperwork takes time from children

Parent letters & newsletters
Announcements and invitations, often in several languages

Meeting minutes & task lists
From rough notes to something shareable

Checklists & agendas
Prepared again and again

The same questions, again and again
Opening hours, policies, procedures

Every hour at the desk is an hour away from the children.

That is the time OpenKita AI wants to give back.

An assistant, not another system

OpenKita AI is ...

- Makes existing Kita administration easier
- Completely open source and self-hosted
- Built to integrate with open-source Kita software
- Human in control: AI drafts, people decide

... and is not

- Another Kita management system
- A competitor to existing tools such as KitaLux
- A service that needs a cloud AI API
- A tool that profiles or assesses children

Integrate, don't compete: designed to work alongside existing open-source Kita software.

Three planned capabilities

v0.1 · in development

Parent Communication Assistant

- Newsletters, announcements, event invitations
- Editable German and English drafts, PDF / DOCX export
- **TR / AR: experimental — native review required**

v0.1 · in development

Administration Assistant

- Rough notes → meeting minutes
- Task lists and checklists
- Agendas

v0.2 · planned

Kita Knowledge Assistant

- Answers from your Kita's own policies, opening hours and procedures
- Shows source references
- Says so when the answer isn't in the documents

Mock-up: summer party

ILLUSTRATIVE MOCK-UP · FICTIONAL DATA

1 · The manager's request

“Summer party on 20 June, from 14:00 to 17:00. Please write a friendly announcement for parents and ask for buffet contributions.”

2 Local AI drafts German text (planned)

3 Translations: EN · TR · AR (experimental)

4 A person edits and approves

Elternbrief · Sommerfest

AI DRAFT · MOCK-UP

Liebe Eltern,

wir freuen uns, Sie herzlich zu unserem Sommerfest am 20. Juni von 14:00 bis 17:00 Uhr einzuladen!

Damit unser Buffet bunt und vielfältig wird, freuen wir uns über Ihre Unterstützung. Bitte geben Sie uns kurz Bescheid, was Sie gerne mitbringen möchten.

Herzliche Grüße
Ihr Kita-Team

Edit

Approve & export (PDF / DOCX)

One draft, four languages

DE Deutsch

Liebe Eltern, wir freuen uns, Sie herzlich zu unserem Sommerfest am 20. Juni von 14:00 bis 17:00 Uhr einzuladen! Damit unser Buffet bunt und vielfältig wird, freuen wir uns über Ihre Unterstützung. Bitte geben Sie uns kurz Bescheid, was Sie gerne mitbringen möchten.

EN English

Dear parents, we warmly invite you to our summer party on 20 June from 2:00 to 5:00 pm! To make our buffet colourful and varied, we would be grateful for your support. Please let us know briefly what you would like to bring.

TR Türkçe — EXPERIMENTAL

Sevgili veliler, sizi 20 Haziran'da saat 14:00–17:00 arasında yapılacak yaz şenliğimize davet etmekten mutluluk duyarız! Büfemizin renkli ve çeşitli olması için desteğinize ihtiyacımız var. Lütfen getirmek istediğiniz şeyi bize kısaca bildirin.

AR العربية — EXPERIMENTAL

أولياء الأمور الأعزاء، يسعدنا أن ندعوكم إلى حفلنا الصيفي يوم 20 حزيران/يونيو من الساعة 2:00 إلى 5:00 مساءً! ولكي يكون البوفيه متنوعًا وغنيًا بالألوان، نأمل أن تساهموا معنا. يرجى إعلامنا بما ترغبون في إحضاره.

Human in the loop

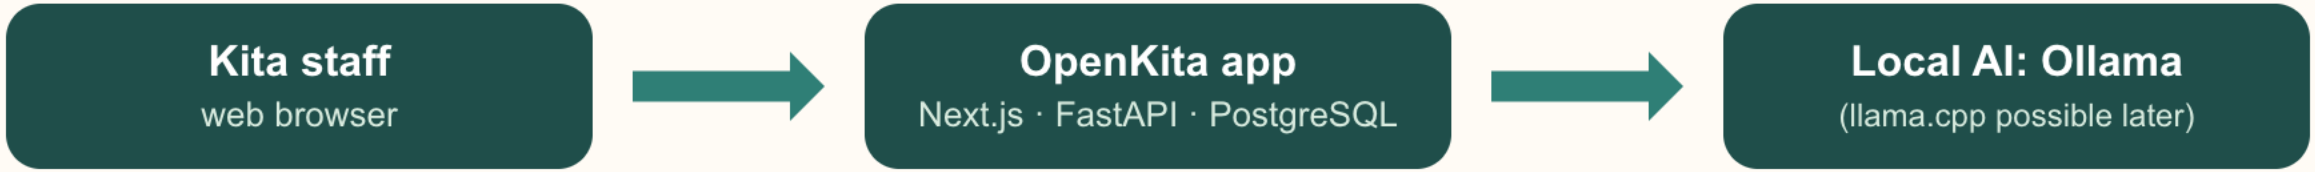

1. **Draft** by local AI
2. **Review** edit text, check translations
3. **Approve** a person decides
4. **Export** PDF or DOCX

AI DRAFT
Not sent until approved

TR / AR: experimental — native review required. Illustrative mock-up translations.

Privacy-first by design

v0.1 DESIGN · LOCAL-ONLY · EXTERNAL AI DISABLED, FAIL-CLOSED

PLANNED · v0.3 · PRIVACY GATEWAY, ONLY AFTER PRIVACY TESTS

v0.1 design

- No child profiles, no automated child assessments
- Human approval before anything is sent or saved as final
- No mandatory cloud AI API; external AI off

Planned · v0.3

- Audit logs
- Gateway: Presidio + spaCy German + rules
- Health, disability and safeguarding data never sent externally

Honest caveat: detection isn't perfect and pseudonymised data is still personal data. This is risk reduction, not GDPR compliance on its own and no replacement for a legal assessment / DPIA.

Fully open source

LICENSED UNDER APACHE 2.0

- Frontend and backend code
- Prompts and workflows
- Database schema and API
- Connectors
- Docker Compose deployment
- **No proprietary edition**

Tech stack

Next.js
Frontend

Python / FastAPI
Backend and API

PostgreSQL + pgvector
Data and search

Ollama / llama.cpp
Local AI models

Docker Compose
Self-hosted deployment

Model weights have their own licences, documented separately.

Code, prompts and deployment are open; AI model weights are a separate matter with their own terms.

Free software, paid services

THE SOFTWARE

Free

Open source and self-hosted. No licence fees, no proprietary edition.

Revenue comes from services

- Installation
- Configuration
- Integration
- Training
- Support and maintenance
- Migration

HYPOTHESIS TO VALIDATE

Test installation package: €1,000–€3,000

plus optional annual support

A price hypothesis, not a market rate. It has not been tested with customers.

OpenKita Box: private AI

PRICE HYPOTHESES · TO VALIDATE

Starter
One small Kita

- 16–32 GB RAM
- ~500 GB SSD
- Small quantised model

~€799–€1,099
price hypothesis

Pro
Larger Kita

- 64 GB RAM
- 1–2 TB SSD
- Ryzen 7-class

~€1,499–€2,499
price hypothesis

Träger Server
Multi-facility

- Central administration
- Several facilities
- Built for providers

from ~€3,000
price hypothesis

Installed on premises; sold to Träger first

CE / WEEE / warranty obligations still need investigation

No promise of good LLM speed on cheap N100-class machines

Honest status: not yet validated

Our validation plan

- **5** Kita managers
- **2** Träger (providers)
- **2** educators

Open risks

- Prices are hypotheses, not market rates
- Hardware obligations (CE / WEEE / warranty)
- Detection limits; legal assessment / DPIA

Key questions

1. Independent assistant that integrates with existing software, or an AI module inside existing platforms?
2. Would they adopt it?
3. What builds trust?

Project status

v0.1 in progress — foundation built (app shell, health checks, Ollama connection test); AI features in development.

Roadmap: from hackathon MVP to v1.0

v0.1

IN PROGRESS

Hackathon MVP

Auth, dashboard, Parent Communication and Administration assistants, local AI via Ollama, basic export

Local-only; external AI disabled, fail-closed

v0.2

PLANNED

Knowledge Assistant

Upload, processing, RAG with source citations

v0.3

PLANNED

Production readiness

Permissions, security review, audit logging, backups/restore, install docs

Privacy Gateway (planned): protected optional external AI, only after privacy tests

v0.4

PLANNED

Integrations

Open-source Kita software, import/export, calendar, more formats

v1.0

PLANNED

Production release

Multi-facility, advanced admin, configurable workflows, improved multilingual, deployment and maintenance tooling

Expansion: Austria · Switzerland · wider Europe
